Created by real editors, the category list is frequently updated.

A380 Flight Crew Operating Manual

Fly-by-wire (FBW) is a system that replaces the conventional manual flight controls of an aircraft with an electronic interface. The movements of flight controls are converted to electronic signals transmitted by wires, and flight control computers determine how to move the actuators at each control surface to provide the ordered response. It can use mechanical flight control backup systems ...

In the case of a conflict or difference between the content of Airbus-WIN and the content published in the Airbus Flight Operations documentation at its latest revision, the latter shall prevail at all times

WorldWide Instructor News - FLIGHT OPERATIONS SUPPORT AND ...

A conventional fixed-wing aircraft flight control system consists of flight control surfaces, the respective cockpit controls, connecting linkages, and the necessary operating mechanisms to control an aircraft's direction in flight. Aircraft engine controls are also considered as flight controls as they change speed.. The fundamentals of aircraft controls are explained in flight dynamics.

Aircraft flight control system - Wikipedia

The EMB-135/145 and ERJ-170/190 are equipped with an Engine Indicating and Crew Alerting System (EICAS) that provides three different message levels: WARNING, CAUTION, and ADVISORY. The ERJ-170/190 Series add STATUS messages. Failures that effect dispatchability are presented to the flight crew at one of these levels.

A flight plan gets submitted to air traffic control by the dispatcher. That same flight plan would get sent to each pilot electronically, and many airlines print this at the gate. The pilot flying would either manually load the flight plan into the FMS or have it automatically uploaded. The loaded route would be verified independently by all ...

We can also give you an individual safety briefing on your flight. If you've already contacted us, then the cabin crew will approach you. Otherwise you can always ask. They will explain the safety procedures, exit locations, and how we can best assist you. A member of our cabin crew will update you when announcements are made on the flight.

Cockpit and avionics. The revised design of the cockpit dropped the A380-sized display and adopted 38 cm (15 in) LCD screens. The new six-screen configuration will have two central displays mounted one above the other (the lower one above the thrust levers) and a single (for each pilot) primary flight/navigation display, with an adjacent on-board information system screen.
