I read about an approach to front-end development called API First Development today and the author mentioned that there are 16 things to consider when developing the front-end. I thought the approach is good but it is too long too complex for my liking. Usually when I develop the front-end of my app I would go through the steps below:

Front-End Development Process | The ASP.NET Forums

The Front-End Developer. If you've ever wondered what makes a website come alive and who makes the magic that you see happen, you're thinking of a front end developer without even knowing it. Essentially, whatever has a visual presence with which people interact is made by with the blood, sweat and tears (mostly tears) of front end developers.
