Among these four cameras, the Pentax is the smallest mainly due to its lack of a motor winder (AF35M, L35AF) and the use of a thumb-wheel instead of a winding lever (C35AF) for manual film advance. Its small size is also partly contributed by its shutter-lock incorporated sliding lens cover which is

the transition to DX, it also included manual film speed settings of ISO 100, 200, 400, and 1000 for non-DX film canisters. This also meant that the user could override the DX setting by covering the contacts on the film canister with tape and then setting the speed to one of the four manual settings.

Read Online Pentax Pc35af M Manual

One of the hardest Pentax cameras to find in working condition, the PC35AF is an elusive gem from the auto-focus compact explosion of the 1980s.

Weighing around 300grams, this model is surprisingly hefty. And, contrary to the 80's plastic aesthetics, Pentax used many metal parts in the fabrication of the body. Following the trail-blazing
