The Civil War used the advances of the Industrial Revolution to foster great changes in industrial and technological development. Both the North and the South made use of advances in railroad and riverine transportation. The Union, however, was far more advanced technologically than the Confederate states. Consequently, the Union made greater and more effective use of progress in transportation, military medicine, and field artillery than did the Confederacy.

Civil War and Industrial and Technological Advances ...

The United States was transformed from an agricultural to industrial society in the years following the Civil War. Factors contributing to this remarkable change included the following: Availability of

massive supplies of raw materials, such as timber, iron ore, oil and other resources Development of new inventions and technology

The New Industrial Age: After the Civil War

The American economy was caught in transition on the eve of the Civil War. What had been an almost purely agricultural economy in 1800 was in the first stages of an industrial revolution which would result in the United States becoming one of the world's leading industrial powers by 1900.

D) brought general prosperity to the poor people of the South. answer : A) was impeded by southern loyalty to the past. 1

In the period after the Civil War, southern industrial ...

The Industrial Revolution (1750–1900). The term Industrial Revolution, like similar historical concepts, is more convenient than precise. It is convenient because history requires division into periods for purposes of understanding and instruction and because there were sufficient innovations at the turn of the 18th and 19th centuries to justify the choice of this as one of the periods.

History of technology - The Industrial Revolution (1750 ...

PIE contributes to international research and practice in industrial ecology for sustainable development. PIE aims to establish channels of communication between academics, practitioners, business stakeholders and the government with an interdisciplinary and international approach to the challenges of corporate social responsibility and inter-organisational environmental management.

The industrial growth started recovering in the year 2009-10 and touched a high of 10 percent. The industrial growth after some setbacks again recovered in the year 2010-11 to reach 8.2 percent. Source: Ministry of Commerce, GOI. The period post-2011 till now.

Industrial development in India - Civildaily

People who are progressive favor reform and civil liberties: this is the opposite of conservative, and means something close to liberal.

progressive - Dictionary Definition : Vocabulary.com

As policymakers discuss what industrial policy should look like today, the four traditions in American industrial policy offer important lessons. First and foremost, any public policy that shapes or structures a sector of the economy is an industrial policy, even the Jacksonian approach, which rejects strategic planning in any coherent sense.
