(1) Over the past decades, the Union has made considerable progress in creating an internal market for banking services. Consequently, in many Member States, banking groups with their headquarters established in other Member States hold a significant market share, and credit institutions have geographically diversified their business, within both the euro area and non-euro area.

"The numbers N6 and N5 look pretty close, but they still have a big gap," said C. C. Wei, chief executive of TSMC, in a recent conference call. "For N5 compared with N7, the logic density increased by 80%. N6 compared with N7 is only 18%. So you can see there's a big difference in that logic density and transistor performance.
