Humpback Whale Facts! - National Geographic Kids

Sea Squirt Sea squirts are tube-shaped sea animals, which, after a short time spent as free swimming larvae, fix themselves onto the sea bed. They filter particles of food from water that is passed through their bodies. Although, like sponges, sea squirts look more like plants than animals, they have organs and a simple nervous system. Lancelets

Animals: The Ultimate Guide To The Animal Kingdom ...

The flatback sea turtle is found in the coastal waters of northern Australia and New Guinea, but only nests on the islands and beaches of northern Australia. This large marine reptile is the least migratory of the seven species of sea turtle. It can be distinguished from other sea turtles by its comparatively flat shell.
