Why are technical drawings still important? It is necessary to include a technical drawing to your order when your 3D CAD model includes: Threads (internal or external). Features with tolerances that exceed the standard. Individual surfaces with specific finishing requirements (surface roughness etc). These requirements cannot be conveyed in a 3D CAD file.

A gear drawing is a type of important technical reference required when designing machines. When a machine designer requires a gear when designing a new machine, there are two possibilities: designing the new gear itself, and utilizing a standard gear which has already been designed. In either case, the gear drawing is indispensable.
